All tools shown in this schedule are necessary in the course of repair work on the chassis types produced in the ten year period preceding 1939. These tools are listed in sections according to the unit for which their use is required and the sections are subdivided to show the appropriate tools for each model.

Tools have been classified in groups 'A' and 'M', and are marked with their classification in the column adjoining the Tool No. The groups are as follows:-

'A' These tools are necessary for general repair work and maintenance,

'M' These tools are for use in more comprehensive repair work including full dismantling of all units.

Information concerning the availability of these tools for purchase or hire, together with cost or hiring charges, may be obtained from the London Service Station.
